My name is Hojin, and 1) I like to make graphic novels.

2) While I was walking home from school last week, I 3) saw a woman on a scooter.

She 4) looked really cool, and her scooter 5) was very unique.

"Are you going home, Hojin?" she 6) said to me suddenly.

"Yes, 7) but do I know you?" I asked.

"Of course," she answered.

"8) I see you at the school cafeteria every day."

9) Surprisingly, she 10) was one of the cafeteria workers at school.

"Amazing! She looks 11) so different outside the school," I thought.

"12) I should write a graphic novel about her."

After I got home, 13) I began to write a new graphic novel, Lunch Lady Begins.

14) In it, Lunch Lady is a superhero.

15) She rides a super scooter that can fly.

She 16) saves people from danger around the world.

She 17) also makes 100 cookies per second and gives them away to hungry children.

18) A few days later, I 19) showed my graphic novel to my friends.

"Awesome! I love this superhero. She's so cool," said all my friends.

"Guess what? 20) I modeled her on Ms. Lee, one 21) of our cafeteria workers," I told them.

I showed my book to Ms. Lee.

23) She loved it, too.

24) She also told me about 25) her coworkers who had special talents.

Ms. Park, another cafeteria worker, 26) won a dancing contest.

Mr. Kim, 27) the janitor at our school, 28) was once an adventurous park ranger.

"I'd like to write superhero 29) stories about them.

Do you think they'll like that?" I asked Ms. Lee.

"Of course they will," she said cheerfully.

30) Let's go and say hello to our new superhero friends."

Grass Roofs

31) Have you ever seen a goat on the roof of a house? In Norway, we can 32) see animals on roofs. Norway has large forests. 33) In harmony with nature, people 34) have built wooden houses for a long time. 35) To build strong and warm houses, 36) they cover their roofs with grass. The grass roofs 37) protect them from the long cold winters and strong winds. Sometimes, 38) trees or plants grow out of the grass roofs, and some animals 39) enjoy their meals there.

Cone-shaped Roofs

A roof is 40) an essential part of a house, but long ago 41) some people built roofs only to take them down easily.

42) Centuries ago in southern Italy, 43) people who had a house without a roof paid lower taxes.

44) To avoid high taxes on their houses, some people 45) built cone-shaped roofs by piling up stones. When 46) tax collectors came to the town, people 47) took their roofs down quickly.

After the tax collectors left, they 48) piled up the stones again.

Big Round Roofs

49) From the sky in a part of southern China, 50) you can see round roofs that look like big doughnuts. They 51) are the roofs of the big round houses of the Hakka people. They 52) have lived in houses like these for about a thousand years 53) to protect themselves from enemies.

The houses 54) have only one gate without any windows on the first floor. 55) Each house is big enough for a whole village. It 56) usually has four stories. It 57) has kitchens on the first floor, 58) storage rooms on the second floor, 59) and living rooms and bedrooms on 60) the third and fourth floors.
