Long ago, 1) an honest merchant lived in Genoa, Italy. His name was Antonio, and he 2) went to different places to support his family by trading. One day, he 3) filled his ship with goods and visited 4) a faraway island. There he 5) traded tools for spices and books for nuts. Thanks to Antonio, the 6) islanders could get what they needed.

One night, Antonio 7) had dinner with the island's queen at her palace. When 8) dinner was served, rats appeared, and some servants 9) chased them away with sticks.

Antonio 10) was greatly surprised that there were rats in the palace. He asked, 11) "Are there no cats on this island?" The queen 12) looked puzzled. "What is a cat?" she asked.

The merchant said to himself, "13) What the islanders here need is not tools or books, but cats." He brought two cats from his ship and 14) let them run free. "15) What amazing animals!" cried the queen when she 16) saw all the rats run away. She gave Antonio 17) a chest that was filled with jewels.

Back in Italy, Antonio told his friends about 18) his good fortune. Luigi, 19) the richest merchant in Genoa, heard the story and 20) was jealous. "21) Cats are worthless," Luigi thought. "I'll bring the queen 23) what is really valuable. I'm sure that the queen will give me more jewels." Luigi packed his ship with 24) wonderful paintings and other works of art. He took the gifts to the island. 25) To get a chance to meet the queen, he told the islanders 26) a lie that he was a good friend of Antonio's. When the queen heard about Luigi, she 27) invited him to her palace for dinner. Before sitting down at the table, Luigi presented the queen with all his gifts, and the queen thanked him again and again. "28) I'll repay you with a priceless gift," said the queen.

Luigi 29) watched the queen whisper in a servant's ear. He became 30) excited and hopeful.

He was sure that he would receive **31)** more jewels than Antonio.

After a while, the servant returned with a box, and the queen presented it to Luigi. When Luigi opened the box, **32)** he was speechless.

There was a kitten in the box. "Antonio **33)** gave us the priceless cats, and we now have some kittens," said the queen. "**34)** In return for the wonderful gifts you gave us, **35)** we want to give you what is most valuable to us."

Luigi realized that, in the queen's mind, **36)** the kitten was worth far more than all the jewels in the world. He tried **37)** to look pleased with the gift. He knew **38)** that was the right thing to do. Luigi did not return home a richer man. But **39)** he was surely a wiser one.

For the science project, our group **40)** has chosen very special insects.

- They are very social.
- They are **41)** as old as the T-Rex.
- They **42)** appear in Aesop's stories.
- They use **43)** a special chemical to communicate.

Can you **44)** guess what they are? Yes, the answer is ants. **45)** We want to share with you what we have learned about these insects.

46) How Many Ants Are on Earth?

We often **47)** see ants come out of nowhere. Like humans, they **48)** live almost everywhere in the world, **49)** except a few extremely cold places including Antarctica. **50)** As of 2018, there were over **51)** 7 billion people on Earth. Then, how about ants? According to scientists, **52)** there are about one million ants for every human in the world. Though **53)** each ant hardly weighs anything, one million ants are **54)** as heavy as a human being weighing about 62 kilograms.

55) What Is the Ant Society Like?

Ants live 56) in colonies which have lots of residents living together. 57) Within a colony, there are usually 58) three different types of ants. There is the queen, and 59) what she does her entire life is lay eggs. The second type of ant is 60) the male that helps the queen produce these eggs. The third type of ant is the worker. 61) Worker ants are all female and do very important jobs, like 62) caring for eggs, defending the colony, and collecting food.

63) How Do Ants Communicate?

64) Though ants do not speak like humans, they actually 65) have a "language." Ants 66) produce a chemical called a pheromone to 67) communicate with one another. By 68) using the chemical, they 69) can exchange information about food or danger. Ants also 70) use touch for communication. For example, if an ant finds food, 71) it passes on the good news by rubbing its body on its neighbor. Since an ant 72) has legs covered with very sensitive hairs, it can sense 73) even the smallest touch.

FUN FACTS ABOUT ANTS

01 Some queen ants 74) live up to 30 years.

02 Some ants 75) can carry things that are 50 times their own body weight.

03 Ants 76) do not have lungs but 77) breathe through small holes in their bodies

04 An ant 78) has two stomachs. One stomach 79) holds food for itself, and 80) the other holds 81) food to share with others.

05 Most ants can 82) swim and live 24 hours underwater.

G: Hey, Minjun. 83) What a surprise!

B: Hi, Sora. I'm glad we're 84) in the same class.

G: I am, too. We're now in our last year in middle school. How do you feel?

B: I'm a little worried that **85)** there'll be more schoolwork.

G: Me, too. We also **86)** have to think about our high school.

B: Which kind of school do you **87)** have in mind?

G: **88)** I'm thinking of an animation high school. I love painting.

G: Oliver, what club are you going to join?

B: **89)** I'm not sure. How about you, Sora?

G: I want to join the school dance club.

B: Really? But I heard **90)** you're preparing for an animation high school.

G: Right, but **91)** I need some time to relax. We all need **92)** to do something to get over stress.

B: **93)** You can say that again.

G: Why don't you join me? It'll be fun.

B: No, thanks. Dancing is not for me. **94)** I have two left feet.

B: Jimin, look! That red phone case **95)** looks nice!

G: **96)** You can say that again! Mom would love it as a birthday present.

B: I wonder **97)** how much it costs.

G: Let me see. **98)** It costs 40,000 won.

B: Really? That's so expensive!

G: I don't agree. Look! **99)** It works as a wallet, too.

B: Oh, **100)** I didn't see that. Then let's buy it for Mom.

G: Okay. **101)** I'm delighted to buy something special for Mom.

B: **102)** So am I.

B: Amber, how do you like the camp?

G: It's great. **103)** I'm having a lot of fun.

B: **104)** Me, too. **105)** The talent show last night was really great.

G: Yeah. **106)** By the way, did you **107)** decide on the afternoon program?

B: No, **108)** I haven't yet. **109)** Which do you think is better, hiking or swimming?

G: **110)** I'll go hiking because we can see wild birds and insects in the woods.

B: **111)** I'll join you. I like birds and insects.

G: Great. I heard we'll have a hiking guide.

B: **112)** Sounds good.

W: Everyone, look at this chestnut tree. This is **113)** the oldest tree in these woods.

B: **114)** Can you tell me how old it is?

W: It's about 150 years old.

B: Wow! **115)** It's ten times my age.

G: Ms. Oh, **116)** is that a beehive up in the tree?

W: Yes. Can you guess how many bees live there?

G: 500 bees?

W: Good guess, but **117)** it's big enough to hold over 50,000 bees.

B, G: **118)** Unbelievable!

B: Sora, can you take a look at these pictures?

G: **119)** What are these for?

B: **120)** I'm trying to choose a picture for my story in the school newspaper.

G: What's your story about?

B: Nature's future.

G: Can you tell me more about it?

B: It's about endangered animals in the Arctic areas.

G: That sounds interesting.

B: Which picture do you think is better?

G: I like the one showing a skinny polar bear.
